

WALL MOUNTED SHELVES A1(01) Assembly Instructions

These shelves may be mounted singly (using 2/3 brackets), or, by bolting them together, as one long shelf (using 3, 4 or 5 brackets depending on the spacing of your glazing bars).

COMPONENTS PER PAIR

	34"	58"
Bracket A	4	6
Bracket B	4	6
Bolts C	6	8
Cropped Bolts D	8	12
Nuts	14	20
Trays	2	2

FIXING INSTRUCTIONS

BRACKETS

Attach A to B using pan headed bolt C and nut. Loosely attach the cropped bolts D with nuts to the other end of A and B. Insert the bolt head into the greenhouse glazing channel and twist to lock. Check A is level and tighten the nuts.

TRAYS

Rest the aluminium trays on the brackets either way up - to give you gravel trays or a flat surface.

Long Term Care of Aluminium Benches & Shelves

Prolonged contact with chemicals containing metal compounds can cause aluminium to corrode (an electrolytic reaction occurs). Typical of these are Cheshunt Compound and Bordeaux mixture both of which contain copper. All chemicals should list their contents and most are metal free. When using these metallic chemicals it is best to line any aluminium surface with polythene, if not wash down well after the application. When growing on a capillary bed (sand, gravel or matting) which is not lined with polythene, apply chemicals to plants away from the bed and drain thoroughly before replacing.
