

HEATED TRAY H5(01)
Assembly Instructions

The Heated Tray is made up as illustrated - so the cover plate is the heated side on which to place your seed trays etc.

WIRING TO PLUG

Connect to your three pin plug as follows:

- Earth wire (yellow and green) to the earth terminal
- Live wire (brown) to the live terminal
- Neutral wire (blue) to the neutral terminal.

IMPORTANT NOTE

1. This appliance **must be earthed.**
2. **Do not** immerse in water.

Long Term Care of Aluminium Benches & Shelves.

Prolonged contact with chemicals containing metal compounds can cause aluminium to corrode (an electrolytic reaction occurs). Typical of these are Cheshunt Compound and Bordeaux mixture both of which contain copper. All chemicals should list their contents and most are metal free.

When using these metallic chemicals it is best to line any aluminium surface with polythene, if not wash down well after the application. When growing on a capillary bed (sand, gravel or matting) which is not lined with polythene, apply chemicals to plants away from the bed and drain thoroughly before replacing.
